Department of Archives and History
929 High Street
Jackson, MS 39202

# DENSITY TARGET

OPERATOR Roger Turlington AGENCY Dept. of Archives & History Records Management Division

VOLTAGE 72.5 REDUCTION RATIO 12 X 1

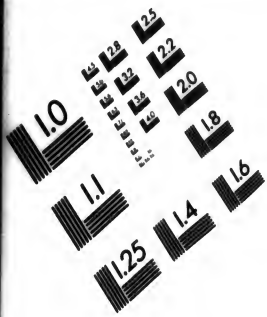

DATE 11/12/92

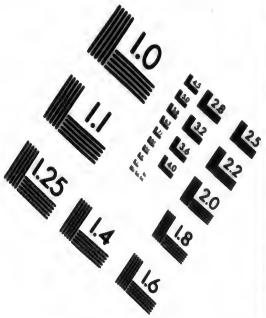

In order to be assured of a reproducible master roll, the American National Standards Institute recommends that film density be maintained between 0.9 and 1.3.

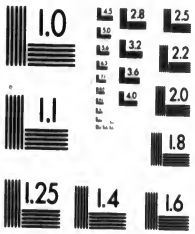

By microfilming this target at the beginning and end of each microfilm roll, a densitometer reading can be made by the State Records Center. If any problem should arise the SRC will report and assist in correcting the problem.

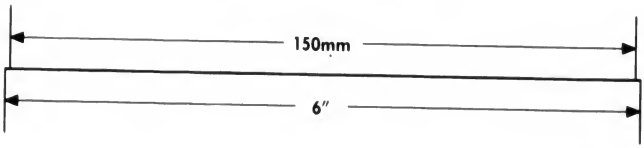

Please do not write in this area -- to be used for densitometer readings.
